### **AirBridgeCargo provides dedicated lift for 28 Maserati Gran Turismo cars**

AirBridgeCargo Airlines (ABC) has delivered twenty-eight shiny new Maserati Gran Turismo vehicles onboard one of its Boeing 747 freighters from Milan to Tokyo.

The charter flight on behalf of Agility Logistics was operated from the largest airport in Milan, Malpensa, to Narita Airport with a stop at Moscow Sheremetyevo Airport in compliance with all standard operational procedures. ABC has developed and introduced special standard operating procedures for the transportation of vehicles, supported by a dedicated team of experienced professionals to ensure every delivery is handled with the highest attention. The Maserati cars were carefully handled by Alha Airport MXP and positioned securely onto double-deck car racks to ensure the efficient use of space and safe transportation. ABC's Boeing 747 proudly displayed Maserati branding for its eye-catching arrival in Tokyo, which was greeted by around 300 guests and media representatives waiting for the aircraft to taxi to its parking spot to commence unloading.

AirBridgeCargo's highly skilled loadmasters, together with three attendants from Maserati, used the offloading of the cars in their white protective covers to demonstrate the airline's smooth, safe and seamless operational procedures. Guests were then invited to attend a welcome reception at the airport, with a formal address from Maserati and the presentation of the cars to customers as well as a unique luxury car photo opportunity for the media.

"This is a unique event as it gives each party involved the perfect opportunity to observe vehicle transportation procedures first-hand. We are honoured to be part of this project and to have been entrusted by the delivery of these magnificent Maserati cars. Our abcXL product was developed in close cooperation with our customers for such an operation to combine tried and tested principles with innovative ideas for efficient and reliable deliveries," highlighted Sergey Lazarev, General Director of AirBridgeCargo Airlines.

“The Agility team brought meticulous planning and handling to this challenge, knowing that anything less wouldn’t be good enough. ABC has been a trustworthy and reliable partner during each phase of the project with a high level of service quality and collaboration,” said Essa Al-Saleh, President and CEO, Agility Global Integrated Logistics.

In the first nine months of 2017, ABC transported over 45,000 tons of vehicles and automotive spare parts throughout its global network. This 24% year-on-year increase is illustrative of ABC’s reputation as an experienced transportation partner to leaders in the Automotive industry.

### **About AirBridgeCargo**

AirBridgeCargo Airlines (ABC) was launched in 2004 as a division of Volga-Dnepr Group to perform internationally scheduled cargo services. Today, it is one of the leading international cargo airlines and a recognized leader in the Russian market. ABC transports its customers’ freight all over the world, connecting shippers and consignees in Europe and the Middle East, North America, Asia and Russia. Throughout its development, the airline has achieved strong growth, reporting a compound average tonnage increase of 12% in the last five years. ABC’s remarkable performance is based on its focus and determination to build long-term relationships with customers around the world and deliver best-in-class service, both in the air and on the ground. The airline is committed to operating to the highest industry standards.

### **About Agility**

Agility brings efficiency to supply chains in some of the globe’s most challenging environments, offering unmatched personal service, a global footprint and customized capabilities in developed and developing economies alike. Agility is one of the world’s leading providers of integrated logistics. It is a publicly traded company with more than \$4.1 billion in revenue and more than 22,000 employees in over 500 offices across 100 countries. Agility’s core commercial business, Global Integrated Logistics (GIL), provides supply chain solutions to meet traditional and complex customer needs. GIL offers air, ocean and road freight forwarding, warehousing, distribution, and specialized services in project logistics, fairs and events, and chemicals. Agility’s Infrastructure group of companies manages industrial real estate and offers logistics-related services, including e-government customs optimization and consulting, waste management and recycling, aviation and ground-handling services, support to governments and ministries of defense, remote infrastructure and life support.
